MRS. PETERS, - MERIDIAN ROAD.

FARMERS, DANCE.
LAST EVENT OF SEASON AT EDMONTON BEACH,
SATURDAY, SEPT. 23rd.
Ladies, 10c. Gents, 25c.

Knights of the Road.

With the advent of the harvest season, it is customary to have men congregate at places where their offers of service may be accepted. Stony has never been an exception to the rule, and was not so this year. More prosperous times have seen a larger number present themselves here for work; but those who have shewn up at rhis point for work this season have aeen of the quieter sort, and nothing out of the ordinary has occurred, other than a dairyman in the suburbs having one of his cows milked, or a small raid on a vegetable garden.

Other towns have not been so fortunate, as may be seen by a perusal of the following from the Viking News:

"The town has been well supplied with the out-of work gentry. Sympathy has led many of the householders to grant the request for a meal. Sometimes this has resulted in unpleasantness. Imagine one of these gents after receiving a stack of bread, well buttered, and a good supply of fresh pickled beets, demanding a cup of tea or coffee. The insolence removes most of the pleasure in the benevolence. The other day one slouched asleep again at the Dodd's garage. Upon the sole of his shoe he had chalked this sign: 'Unless you pay $3.50 a day, don't wake me up.'

"Now may be that was a joke, but it savors of the old-time hobo. As long as food comes easily and the railway permit free passage on "the rods" these knights of the road will not accept the wages the farmers are able to pay."

A Separator Ditched.

On Thursday evening last, while Mr Louie Heichel Jr. of Golden Spike, was taking home a new Cockshutt separator and tractor, purchased in the City that afternoon, the outfit had the misfortune to get crowded off the Highway about a mile west of the City limits. Young Mr Fred Ulmer, the pilot on the tractor, was tossed over a fence. Not much damage was done the tractor. With the separator it was different; on account of its top heaviness, it went over with a crash, disturbing the internal mechanism somewhat. The pair were drawn back to the roadway and taken to the City. It seems the recent heavy rains had softened the shoulder of the gravel road at teat point.

Jr. Grain Men Given Placings

Awards have just been given out in the Alberta junior grain growing competitions in which Holborn is 1st for wheat; Wolf Creek, 1st for oats; Andrew for barley; Lethbridge, for corn; and in the potato competition Wetaskiwin was first.

Club standings for wheat: Holborn 87 7; Vegreville 85 2; Bindloss 83 3; Holden 82 9; Viking 82.6; Camrose 82.12; Ohaton 82 9; Gr. Prairie 81.6.

Highest individual club plots: Holborn—1, Henry Schlecker 97; Henry Everington 95.5; Billy Clark 95.

The International Wheat Agreement

In this column last week reference was made to the speech delivered by Premier Bennett on his return to Canada from the World Economic Conference and International Conference of wheat exporting and importing nations. Important facts, figures and general information affecting the world wheat situation were presented, all of which had a bearing upon and led up to the entering into of an agreement by twenty-one nations vitally interested either as exporters or importers of wheat designed to advance the common interests of all.

Inasmuch as there is no one question of more vital importance to the people of Canada, and more particularly of Western Canada, than wheat, we propose to supplement last week's article by a further reference to the subject. Statistics compiled covering a long period of years go to establish the fact that when the wheat producers of the world are prosperous,—that is, when the price of wheat is high enough to return a fair profit to the farmers raising it,—industry generally throughout the world is likewise prosperous. In other words, wheat is shown to be the barometer of prosperity. Naturally so, because it is the standard food of the great bulk of the human race.

First, we recite the terms of the new international wheat agreement:

The chief wheat exporting nations, that is Canada, Australia, Argentine and the United States, agree to limit their combined exports of wheat in the crop year August 1, 1933, to July 31, 1934 so that the total world exports of all countries shall not exceed 560,000,000 bushels. Of this amount Canada's export allotment is 200,000,000 bushels.

These four countries further agree that during the following crop year August 1, 1934, to July 31, 1935, they will limit their exports of wheat to maximum figures 15 per cent. less than the average yield and average acreage sown during the period 1931-1933 inclusive.

The minor wheat exporting countries, that is Bulgaria, Hungary, Roumania and Yugo-Slavia agree to limit their combined wheat exports in both the crop years 1933-34 and 1934-35 to 50,000,000 bushels.

While Russia entered into no definite agreement as to restrictions on either production or exports it did agree to enter into further negotiations governing exports.

On the other hand, the importing countries:

(1) Agreed not to encourage any increase in the area sown to wheat in their respective countries.

(2) Agreed not to take any governmental measures the effect of which would be to increase the domestic production of wheat.

(3) Agreed to adopt every possible measure to increase the consumption of wheat.

(4) Agreed to the removal of measures which tend to lower the quality of breadstuffs, and thereby decrease the human consumption of wheat.

(5) Agreed to lower their customs tariffs on wheat when the world price reaches and maintains for a specified period an average fixed price.

Finally, an international Wheat Advisory Committee was set up, representative of both exporting and importing countries, to watch over the working and application of this agreement.

Such is the new international agreement governing future wheat production and export. It is one concrete outcome of the World Economic Conference. Whether it will prove practical in operation and satisfactory in its results time alone will disclose.

It involves the export of less wheat on the part of Canada than was hitherto the case in normal years. Consequently, it involves the raising of less wheat, and the putting of a stop to further increases in wheat acreages and production. For the crop year 1934-35 this reduction is set at 15 per cent. below the average for 1931-33.

Admittedly, the Dominion Government can restrict exports to any figure it may like. That is entirely within its control. But how can that Government limit production? In the United States it is being attempted by paying a bonus to farmers to reduce their wheat acreage, the said bonus to be paid out of a fund created by imposing a special tax on all wheat consumed in the United States. In other words, compensation is being offered the U.S. farmer. It is reported from Ottawa that this idea does not meet with favor nor find much support there.

It is futher reported from Ottawa that the Federal Government does not intend to apply any compulsion to bring about a 15 per cent. reduction in wheat acreage, but will rely on an educational campaign among farmers designed to encourage and bring about a voluntary reduction by them. Will the farmers respond to such a campaign? And if certain farmers are willing, and certain farmers are not, what will the result be? If one farmer reduces 15 per cent. and another increases 15 per cent. the country will be in exactly the same position. If one set of farmers decline to reduce 15 per cent., even if they do not increase their production, it means that another set of farmers would have to reduce 30 per cent. in order to bring about an average 15 per cent. reduction.

Then, it is to be noted, that the 15 per cent. reduction in 1934-35 is to be from the average yield and acreage sown in 1931-33 inclusive. But tens of thousands of Western farmers and millions of acres of land produced little or nothing in these years. They must be allowed to produce as largely as possible in 1933-34 and 1934-35 in order to recoup their heavy losses in these disastrous years. If they are to do so, and at the same time the total production is to be reduced by 15 per cent., it seems inevitable that those farmers who had fair crops in the period 1931-33 must decrease their future reduction by very much more than 15 per cent.

And what, it will be asked, is to be done with the acreage taken out of wheat production? Can our farmers afford to work it and allow it to lie fallow? They cannot afford to let it run to weeds. Will the result not be to devote it to other grains with the inevitable result of large surpluses of such grains over and above domestic and export demands?

Without attempting to speculate on the effect which weather conditions will inevitably have on the success or failure of the proposed plan of restriction,—and which of course are beyond all human control,—one further question arises: If production is not decreased while at the same time exports from Canada are restricted, and as a consequence surpluses pile up on the farms or huge carry-overs are built up in the elevators, what will the effect of such surpluses have upon the world prices? It is admitted that our present large carry-overs have depressed and continue to depress prices. What hope is there of a rise in international prices, and a consequent lowering of tariffs by importing countries, if available wheat supplies are not limited to demand?

Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months.

You cannot tell when it seizes you how it is going to end. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Carnivorous Plants

Trap Insects With Lightning-Like Rapidity In Snapping Maws

New light was cast on mysterious workings of the snapping maws of carnivorous plants. Prof. F. E. Lloyd, president for 1932-33 of the Royal Society of Canada, in his presidential address to the botanical section of the British Association for the Advancement of Science, recounted his observations of some 75 species of the bladderwort—a type of plant that snatches its food from air or water.

The professor of botany at McGill University, Montreal, contributed a highly technical paper which he labelled a continuation of his review of carnivorous plants.

The address set out the details of the structure of the "door" which the flesh-eating aquatic or terrestrial plant slams shut on such unfortunate small insects as may come wandering within reach. Superspeed-motion pictures, Prof. Lloyd related, had disclosed the hungry bladderwort opened the fatal door in 1-160 second and closed it in 1-40 second, completing the whole operation inside 1-16 second. Included in the 75 types in Prof. Lloyd's summary was the purple bladderwort found growing in the vicinity of Montreal.

3 MONTHS ON BISCUITS AND MILK

Woman's Digestive Troubles

Everyone who is subject to any form of indigestion should know of this woman's experiences. Advice from one who has had such severe attacks is advice worth having. She writes:—

"I suffered from indigestion, gastritis and constipation, and was so very ill, I had (on medical advice) to live on soda biscuits and milk for three months. Well, a friend advised me to take Kruschen, and now I am pleased to say my troubles are ended. I can eat and enjoy a good meal without any painful after-effects, my skin is clearer—in fact, quite clear—and there is no sign of constipation. I would advise anyone suffering the same to take Kruschen."—(Mrs.) M.R.L.

The immediate effect of the six salts in Kruschen is to promote a natural flow of the digestive and other vital juices of the body. Soon after you start on Kruschen you will find that you are able to enjoy your food without any distressing after-effects. And as you persevere with the "little daily dose," you will see that the relief which Kruschen brings is lasting relief.

Old Newspaper Changes Hands

Selkirk Record Was Founded 48 Years Ago

The Selkirk Record, weekly publication founded 48 years ago by the late James Stewart and carried on by his son, Robert, has been sold by his daughter, Mrs. Margaret I. Colcleugh, to Charles A. Crouder, who has been a member of the Record staff for the past ten years, and W. H. G. Taylor. The management of the paper has been in the hands of Mrs. Colcleugh for six years, owing to her father's illness, part of the time, and his active engagement with another newspaper enterprise in the eastern part of the province. The new owners announces a policy of independence in politics.

Should Have Foreseen Slump

Expert Thinks Managers Of Banks Were "Extremely Blind"

Managers of central banks throughout the world were "extremely blind," in not foreseeing the approaching depression some years ago, the royal commission on banking was told at Toronto. It did not follow that it was impossible to secure a Canadian of sufficient ability and vision to head such an institution in Canada.

This viewpoint was expressed by A. J. Glazenbrook, special lecturer in banking at the University of Toronto, in answer to questions by Sir Thomas White, a member of the commission.

Where Phonographs Are Barred

Phonographs have been barred fom Yemen, in Southeast Arabia. The Imam has ruled that anyone having one of the sound producers will be dealt with severely. He also has issued another law imposing a tax on every man who shaves his beard.

Up-Side-Down Flying

Italian Ace Describes Feeling In Three-Hour Trip

Sitting in a Chicago hotel, breakfasting on a muskmelon and coffee, Lieut. Tito Falconi told of his experiences in making a new world's record for up-side-down flight. His latest wrong-side-up flight was from St. Louis to Joliet, Ill., a trip that took three hours and seven minutes because of the slow speed rate that this type of flying requires.

"It's a swell feeling when you turn upright again," said Falconi. "It's like getting well after you've been sick.

Asked if a sensation of dizziness overtook him ,the swarthy little Italian ace replied, "Ah, no. The only sensation is one of pain because of the constant weight on one's shoulders. In this method of flying the pilot is held in the ship by straps which fasten around the shoulder, and the sensation felt is the same one gets from carrying say, a 150-pound weight in a basket hanging from the shoulders."

The most thrilling experience in Falconi's career, he said, was had on this trip when his right safety strap gave way about an hour out. He was dropped half way out of the cockpit, his goggles were torn off by by the terrific wind, and he was unable to see. An added peril was the fact that he did not wear a parachute, its weight being too great a handicap in the suspended position.

Egypt Buys British 'Planes

Said To Be Used In Fight Against Drug Traffic

A firm in Manchester has received an order from the Egyptian government for ten aeroplanes of the Avron 626 type. The type is a development of the "Tutor" type, an order for 300 of which was placed with the firm a year ago by the British air ministry, on the fulfilment of which the Newton Heath works are still engaged.

The type is one on which pilots can be trained in every branch of military flying, including blind flying and bombing.

It is reported that the machines are to be used in the Egyptian government's fight against the drug traffic. The machines are admirably adapted for long-distances patrol work, and have machine-gun, wireless and photographic equipment, and each carries a pilot and a navigator.

Gas In The Stomach

Gas in the stomach, belching, sour water brash, pain after eating, etc., can be overcome within three minutes if you will take a little Bisurated Magnesia in water after you eat. The ordinary Bisurated Magnesia which you can get at any drug store will correct acid stomach and stop acid indigestion immediately. Try it and see.

Ready For Distribution

Saskatchewan Salt From Simpson Well Placed On Market

The first shipment of Saskatchewan salt, taken from the Simpson salt well is ready for distribution. More than seven years ago a company drilled for oil and about two years ago secured a salt brine deposit. The brine is being vaporized into salt by the Simpson Oil Company.

A well is being drilled about one and a quarter miles east of the salt well, where it is hoped to tap gas, to be used at the salt well for vaporization. With the profits from the salt the company will continue its search for oil in a field that geologists have said has good possibilities for the discovery of oil.

Tea Restriction

Protection Afforded Tea Grower Results In Higer Prices

In April a restriction was placed on tea exports from Ceylon, India, and Java, in order to raise prices to growers, who, for almost four years, had been suffering devastating losses. Higher prices have resulted, not only at the gardens, but also here on our own markets, and many package teas already cost more than they did six months ago. Some of the finer quality brands are as yet unchanged, however, and are, consequently, even better value than at last April.

All's Well That Smokes Well

All's well with the pipe, all's well with the smoker when Ogden's Cut Plug is lit and drawing well.

Ogden's Cut Plug is a downright fine tobacco . . . cool, mellow and satisfying . . . made for the pipe, made to pack right, to light right and to smoke right. See what a difference it will make in your pipe!

OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chantecler cigarette papers

Taking Second Place

The time-honored onion has finally lost its grip on Bermuda. Agricultural statistics for 1933 show that for the first time the Bermuda onion is playing second fiddle to other vegetables in number of crates shipped from the island, tomatoes leading by a score of 30,881 to 20,861. Carrots also passed onions this year with a grand score of 24,890 crates.

Saskatchewan is the world's greatest wheat growing province.

Professor Drummond Sees No Chance Of Making Profit From Canada's Basic Industry

"Any person who looks for a profit from farming in 1933 should have his head examined," Prof. W. M. Drummond, of the University of Toronto, declared at the Liberal-Conservative summer school at Newmarket, Ont.

"There has been so much said since 1932 about the fundamental importance of a prosperous agriculture in this country, of the absolute impossibility of anybody in Canada being prosperous without Canada's farmers being prosperous that one would have thought the major interest of reformers with any materialistic ambition would have turned towards the formulation of a policy calculated to guarantee the utmost in the way of a prosperous agriculture," he went on.

"The fact that such has not been the case leads us to the conclusion that most of the statements concerning the great importance of agriculture in our national life were never intended to be taken seriously."

The reformer who would improve the farmer's lot was almost certain to throw up his hands in despair after really looking at the task in hand, Professor Drummond said.

The very nature of farming prevented curtailment of production to meet a falling market, he asserted. The farmer, in his bargaining contracts, was usually in the position of the non-union laborer seeking work from an employer of many thousands of men.

While prices might drop, he said, costs usually remained at the same old level. A correspondingly large portion of the income has to go to the covering of fixed costs, while at the same time falling prices stimulated the farmer to produce more in order to attempt to cover his costs.

The profession of the farmer, Prof. Drummond held, was as dignified as was necessary. Much of the farmers' trouble could be traced to the opinion held by many city dwellers that the man of the soil was not any too bright.

"We must see to it that the stigma is removed and that the farmer himself is equipped with a proper pride in his work. Unless we do we are only admitting insincerity when we talk about an intelligent and prosperous agriculture population."

A Wonderful Record

Cow At Woodstock, Ontario, Acclaimed As Greatest Holstein

At Woodstock, Ont., is a cow named Springbank Snow Countess which is acclaimed as the greatest Holstein on record. This record is, indeed, awe inspiring. During her lifetime this cow has produced 9,977 pounds of butter, approximately 200 cubic feet. Molded into conventional bricks this would make a line three-quarters of a mile long, or a wall five feet high and nearly 90 feet long. It is enough butter to spread on 691,200 slices of bread, making the generous allowance of half a cubic inch to a slice. That many slices of bread would cover two entire football fields, including end zones, and there would be enough left over to cover two-thirds of another field. It would pave ten 300-foot blocks of a street 38 feet wide. The milk this cow yearly produces is enough to supply more than a score of children with a quart every day.

It is truly a wonderful cow.—Detroit Free Press.

Nearest Thing He Knew

She shut off the gramophone and turned excitedly to her father.

"Dad," she exclaimed, "that is the latest kind of jazz record. Did you ever hear anything so wonderful?"

Father, who had been trying to read his evening paper, grunted.

"No," he replied wearily. "I can't say I have, although I once heard a collision between a wagon load of empty milk cans and a farm-cart filled with ducks."

Nearly twice as many bananas are being shipped from Guadeloupe, French West Indies, as a year ago.

Good Amateur Sprinter

Prince Of Wales Beaten Only By Inches In Race

England's 38-year-old Prince of Wales may be a poor horseman, but he has just revealed himself to be an amateur sprinter of considerable merit.

Competing in the Old Comrades' races at the Welsh Guards annual sports at Windsor Barracks, the prince, who is colonel-in-chief of the regiment, was beaten only by inches after starting from scratch in the 100 yards flat race, was seventh to much younger men in the 100 yards handicap for officers, and second in the 50 yards backwards race for men and women.

The races were not exactly up to Olympic standards, and most of the competitors ran in everyday long trousers and walking shoes, but the events were contested in great style, with the prince a leading figure.

Great Weakness Of Canada's Export System

Not Knowing Real Requirements Of British Market

One of the greatest weaknesses in Canada's exporting system is "that we do not always give people what they want in the form in which they want it," Hon. G. Howard Ferguson, Canadian High Commissioner to Great Britain, told a Canadian Club luncheon meeting in Toronto.

"We try to sell them something they have," he said. "It is easier to sell a man what he wants than try to persuade him that a substitute will do.

Canadian business men, said the High Commissioner, could not do better than send representatives to Old Country to study conditions and learn the requirements.

"We in Canada," he said, "should never forget the fact that 25 per cent. of the people of Great Britain are food producers for whom the task of providing food for 100 per cent. of England's population is an impossible one."

Excess Wheat Production

Problem Result Of Necessity For Supply During War

The problem of excess production of foodstuffs can be traced directly to the necessity of supplying the armies in the world war. World production of wheat in 1913-1914, China excluded, totaled 4,126,000,000 bushels. 1929, with Russia also excluded the output was 4,017,000,000 bushels. In 1932-33 a sharp reduction in yields in the United States was chiefly responsible for the lower total of 3,760,000,000 bushels with Russia and China excluded. Semi-failures of crops in the last two years removed Russia temporarily as an exporting factor. Meanwhile Germany, Poland, Australia, Canada, the Argentine and some of the Danubian countries notably increased their wheat acreage. If and when Russia re-enters the world markets, there is in prospect a wheat glut that may ruin the price structure for any agriculture group on an export basis.—Chicago Daily News.

According To Calculation

Normal Man At 70 Has Eaten 700 Times His weight

A healthy man, with a normal appetite, who reaches 70 has eaten 700 times his own weight, according to the calculation of experts of the Faculty of Paris. They have figured that in his span of seventy years the average man of 140 pounds would have eaten thirteen tons of bread, fifteen tons of vegetables, seven tons of meat or thirteen whole cows, seven tons of fruit, 1,600 pounds of candy and sugar, drunk 15,000 quarts of milk and 20,000 quarts of beer, in Europe, or water in America.

Advantages Of Rural Life Offer Attractions To The Town Dweller In Many Ways

(Charles Downing Lay, in New York Herald-Tribune.)

Unemployment and its consequences in reduced rations give many city people a longing for country life with its constant occupation on the land. Our present circumstances may, therefore, explain the revival, after a quarter of a century, of the back to the land cry, which seems to gain headway in spite of distress and bankruptcy in agricultural communities.

The charms of rural life is always the same; only the counter attractions of the town go up and down in value with prosperity and with depression. In any period, good or bad, a well man can always produce a good living for his family from the soil. Those who love country living are ever looking toward the farm and are not to be deterred by city sneers at muddy boots or dusty clothes or sweaty brows, or by clever remarks about being chambermaid to a cow, for they know well the delight of seeing the milk come home frozen in the pail, the luxury of rich cream and sweet butter.

They know too the ecstasy of spring mornings when they see the sun rise over the hills and they have felt the not always silent welcome of the cows and horses when the stable doors are opened at feeding time. They know the voice of their own rooster crowing to the dawn and geese and turkeys when they speak and strut. Though the care of animals be exacting, it is always a pleasant occupation for some people, and the companionship of the dumbest horse means something to the man who works with him. Some men (and women, too), are born stockmen or horsemen or poultrymen, and would always be so employed if they could choose. Others take naturally to fruit growing or gardening, and because they have a feeling for growing things they always do their work in the right way and at the right time and produce the finest fruit and the biggest crops.

The two occupations of agriculture and animal husbandry cannot well be separated. The stockman must raise feed for his cattle and the gardener must have a draft animal for work and for the necessary supply of manure, which produced on the farm saves money that otherwise must go to manufacturers of chemicals.

What the farmer produces for his own consumption should be some gain, and he has the chance on most farms to produce all his food and live like a prince if he has a good cook for a princess. Home grown milk, eggs, butter, cheese, poultry, pork, veal and sometimes beef, with vegetables, meal and fruit in abundance not forgetting a hundred other delicacies like maple sugar and honey give the farmer every requisite for high living and provide the best possible reason for the city man's urge toward rural life.

If the farmer's cellar is full of apples, potatoes, celery, cabbage and other things, including barrels of wine and cider, and if his smokehouse is full of hams, bacon and shoulders, and the pantry shelves are sagging with home-made jellies and preserves in glass, why shouldn't he laugh out loud at the sight of the city man going to the delicatessen for a half-size can of beans or half a roast chicken (and a leghorn at that) and two oranges?

Farm life will always be popular with people who like to live well, and so long as the farm table groans it will be doubly attractive in a depression.

Middle Age Of Year

Thirty days hath September and the month with a little of everything in it; an epitome of the year, with its hottest spell of summer often coming at its beginning, a mild threat of winter at its end on the verge of Indian summer, and a souvenir of April somewhere in between, some fresh morning before the first ruddiness appears in the parks and country woods, as the year now in its hale middle age remembers its youth.

Scientists Study Volcanic Ash

Professor Of University Of Saskatchewan Completes Important Research

Professor W. G. Worcester of the ceramic department of the University of Saskatchewan has recently completed an important piece of research on the possible uses for volcanic ash in the field of ceramics, according to a bulletin of the department of railways, labor and industries.

Extensive deposits of volcanic ash have been found in Saskatchewan in the Swift Current district. Other deposits are also known to exist in the Twelve Mile Lake Valley near St. Victor and in the general area known as Wood Mountain.

There has been established at Swift Current a large plant which now produces household cleansers, abrasive products which have volcanic ash as their base material.

The work so far has proven that within certain limitations the volcanic ash under consideration can be used as a substitute for feldspar in a number of ceramic products. It is to be mentioned that at present the discovery is likely to prove of more interest and importance to western Canada than to the more easterly sections, where an abundant supply of excellent feldspar is available in all commercial grades.

Epidemic Mystifies Farmers In Trinidad

Natives Think Wrath Of Gods Causing Cattle To Die

A mysterious epidemic of cattle deaths, puzzling superstitious east Indian farmers has broken out in the neighborhood of a deserted old French airport, 14 miles from Port of Spain, Trinidad.

The epidemic believed caused by blood-thirsty vampire bats, has discouraged the natives' belief in the use of inoculation of cattle and the farmers are restoring to the old method of sacrifice to appease the wrath of the gods which they believe are now visiting them.

Sky A Sea Of Flames

Within four hours 3,000 flashes of lightning were counted by an official lightning autographic instrument during heavy thunderstorms in west Germany and the Dutch frontier districts. The instrument was at Nordhorn, Westphalia. In one and one-half hours between 30 and 40 discharges a minute were registered. Observers say that during the four hours the sky was a sea of flames.

FIRST TIGER CUBS BORN IN ENGLAND IN FIFTY YEARS

Our picture shows three tiger cubs born at Whipsnade Zoo, in England, on view for the first time. Now seven weeks old, these playful little lumps of striped wool are the first to be born and continue to live in England, in captivity, for fifty years. The mother is giving one of the cubs a wash-and-brush-up with her substantial tongue.

WORLD HAPPENINGS BRIEFLY TOLD

Two military aeroplanes collided in the air at Kielce, Poland, killing four occupants.

T. A. Love, Grand Forks, B.C., was elected president of the British Columbia-Yukon Weekly Newspapers Association.

Robert Van Rolleghem demonstrated at Brussels, Germany, a miniature aeroplane which, he contends, is proof against fire and heat.

Brazil's new "pure coffee" law has become effective and hereafter stores can sell only coffee fresh from the roaster. Ten days old is the limit.

The world Jewish Conference closed its sessions by adopting a resolution calling for a boycott on German goods until the rights of Jews in Germany have been restored.

The radio station at Cameron Bay has been destroyed by fire, it was learned in a radio message received at Churchill. No details regarding the blaze were given. The cause of the fire is not known.

Samuel Brisbin, 73-year-old chief engineer of the "Noronic," flagship of the Northern Navigation fleet, has seen 52 years' service on the lakes, his anniversary being held recently.

Discussion of plans for the Canadian Medical Association Convention in Calgary in June, 1934, has resulted in a decision to invite the Prince of Wales to attend as the prince's birthday, June 23, occurs during convention.

Calgary Fish and Game Association has decided to start an investigation of the disease which has killed thousands of ducks in southern Alberta this season, the heaviest toll occurred at Stobart Lake, about 42 miles east of Calgary.

Sir Gilbert Christopher Vyle, prominent financier and engineer who acted as industrial adviser to the United Kingdom delegation at the imperial economic conference held in Ottawa last year, is dead at his home in Birmingham, England. He was 63 years of age.

A Queer Voyage

Trip From England To The Black Sea In Hand Propelled Boat

Oddest of many queer voyages attempted in recent years is the trip which two Edmonton, England, men have started with the Black Sea as their goal. Their collapsible boat made of a form of aluminum is operated by pedals and hand propellers. Four knots is the estimated speed of the boat, which weighs about a quarter of a ton. The itinerary is from Southampton, through the Bay of Biscay, past Gibraltar and into the Mediterranean, then along the northern African coast and so on. Varna is the destination of the boat, but a call will be made at Constantinople, and the return will be by way of the European coast of the Mediterranean.

Scientists Are Puzzled

Have No Theory About Weird Noises Over Yellowstone Lake

Yellowstone Park rangers and scientists are still pondering, after 50 years of mystery, over the strange sounds heard over Yellowstone Lake every morning in the late summer. The weird inexplicable noises begin like the muffled sounds of birds in flight with whirring, flapping wings, rise quickly in crescendo and end as a sustained note with distinct rhythmic quality.

All theories so far offered for the phenomenon have been dispelled by observations.

Preventing Honey Spoilage

In helping to prevent honey spoilage, the division of bacteriology, Dominion department of agriculture, has evolved a method by which an examination of freshly extracted honey will indicate whether the honey may be expected to remain safe from fermentation within one year.

Finland has ruled that employers must insure domestic servants against accident.

An average of 600 cabs are laid up for repairs in London at all times.

W. N. U. 2012

Busy On New Theory

Einstein Pleased With Quiet Refuge On Norfolk Coast

Anybody attempting to molest Albert Einstein in his humble refuge on the Norfolk coast may get bullets from guns of his host's game keepers.

And if Commander Oliver Locker Lampson himself is around, any intruder may have to face the revolver which the member of parliament reputedly is carrying while the celebrated mathematician is under his protection.

Professor Einstein arrived from London fleeing reported Nazi threats against his life, and set about at once in his quiet, tree-surrounded retreat to work on a new mathematical theory—the nature of which was not disclosed.

He said he was not responsible for the "Brown Book" which incurred Hitlerite wrath and which, Nazis alleged, was a compilation of victims of persecution.

Sitting in a small hut in a garden facing the North Sea, the professor looked smilingly content as he puffed his pipe and spoke of the Nazi threat against him.

"All I want is peace, and where could I find a more peaceful retreat than in England?" he asked a visitor.

Gathering Data On Meteors

Observers Will Check Progress During Byrd's Expedition To South Pole

One hundred and twenty sky observers, located at points all over the world, will check the progress of meteors during Commander Byrd's south pole expedition.

Byrd's chief astronomer, Prof. J. Poulter of Mount Pleasant, Ia., has made arrangements for these observation stations, which will form three progressive lines from the north to the south.

One string of stations will extend from Toronto, Canada, to the southern tip of South America. Another will be operated by the British Astronomical Association and will extend from Norway through Africa. The third will start at Tokio, Japan, and extend through Australia.

The observers will gather data on the speed and direction of fall of the meteors. Professor Poulter will operate the southernmost station of Little America, he said.

Recipes For This Week

(By Betty Barclay)

CHEESE BISCUITS

1 cup sifted flour.
1 teaspoon combination baking powder.
½ teaspoon salt.
1 tablespoon butter or other shortening.
½ cup grated cheese.
⅔ cup milk or water.

Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening and cheese. Add liquid gradually until soft dough is formed. Roll ½ inch thick on slightly floured board. Cut with small, floured biscuit cutter. Bake in hot oven (450 degrees Fahrenheit) 15 minutes. Makes 12 biscuits.

CALIFORNIA PRUNE PIE

2 cups cooked prunes.
1 orange.
½ cup brown sugar.
¼ teaspoon salt.
2 tablespoons butter.
1 cup liquid from prunes.
2 tablespoons cornstarch.
Baked pastry shell.
Meringue, flavored with few drops lemon extract (use 2 egg whites.)

Pit prunes and cut in half. Peel orange, removing white inner peel completely, and dice orange. Combine prunes, orange, sugar, salt, butter, prune liquid, and bring to a boil. Dissolve cornstarch in 2 tablespoons cold water, add to boiling mixture and cook until thick. Pour into baked pastry shell, cover with meringue and brown in a moderate oven (330 degrees Fahrenheit) for 15 minutes.

Excellent crops have caused an appreciable improvement in trade in Denmark.

It isn't the cost of getting men into office, but the upkeep that hurts.

Suggests Debt Settlement

Sir Harry Armstrong Has Idea For Britain and United States

Sir Harry G. Armstrong, formerly Consul-General at New York, has written on the payment of the War debt problem and especially on the debt of Great Britain to the United States. He discusses what is expected by the United States, what is possible for Britain to do, and then he makes certain suggestions as a compromise or at least as a practical suggestion for settlement.

This comprises cutting the amount to about one-fourth its present nominal amount, or $4,600,000,000 estimated debt to £200,000,000 to be paid in a single sum in sterling gold bonds bearing 3½ per cent. interest, which would be probably cashed in Europe giving the gold to the United States at once. This simply amounts to putting Great Britain through the bankruptcy court and accepting about 22 cents on the dollar, which is usually considered a very good settlement. When it is considered, moreover, that it takes fully twice as much of British merchandise to pay a dollar today as when the debt was contracted, and that all securities and industrial investments have depreciated similarly such a payment is a very fair one and the creditor is fully justified in asking its acceptance.—Hamilton Herald.

Winnipeg Newspaper Union

Fashions

By Ruth Rogers

438

VARIOUS POINTS ABOUT THIS SMART DRESS HAVE BEEN THOUGHT OUT FOR MATRONS

For instance, the one-sided softly falling rever cuts the bodice breadth. Still more helpful perhaps is the unbroken line, created by the partial belt arrangement, which gives height to the figure. The inset panel at the center-front, also does its bit toward slenderness.

Style No. 438 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 4⅛ yards of 39-inch material with ⅝ yard of 10-inch lace.

Plain crepe silks are splendid in beige, grey, or dark blue.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

REVIEW: SOME EARLY LEADERS OF ISRAEL

Golden Text: "Be strong in the Lord, and in the strength of His might."—Ephesians 6:10.

Devotional Reading: Hebrews 11: 22 to 12:2.

A Review By Means Of Allusions

"A man who has had the advantage of intellectual training cannot escape the penalty of his wickedness when he barters his brains for a mess of pottage."

When generous acts bloom from unselfish thoughts,
The Lord is with us, though we know it not.—Lucy Larcom.

Happy the heart that keeps its twilight hour,
And, in the depths of heavenly peace reclined,
Loves to commune with thoughts of tender power—
Thoughts that ascend, like angels beautiful,
A shining Jacob's ladder of the mind!
—Paul M. Hayne.

"If I am only an instrument for gathering materials and another shall build the house, I trust my joy will be none the less.—William Carey.

The moment we move, the dog is after us. He says in effect, "Where thou goest, I will go."

"There is waiting for you an inheritance—some promised Hebron, some gift of God's infinite love in Christ. It is for you to say, 'Give me this mountain'."

"O, give me Samuel's ear,
The open ear, O Lord,
Alive and quick to hear
Each whisper of Thy Word!"

"Latest born of Jessie's race,
Wonder lights thy bashful face,
While the prophets gifted oil
Seals thee for a path of toil."

And his next son, for wealth, and wisdom famed,
The clouded ark of God, till then in tents
Wandering, shall in a glorious temple enshrine.—Milton.

You wun't do much until you think it's God,
An' not constitoounts, thet holds the rod;
We want some more o' Gideon's sword I jedge,
For proclamations ha'nt no gret of edge.—Lowell.

Uses Novel Method

King Boris Gradually Getting Better Roads For Bulgaria

King Boris of Bulgaria, ardent motorist, wants good roads for his realm and has found a novel way of getting them.

Every time he drives his car over a bad and bumpy stretch, he notes its exact location, and next day invites his minister of highways and communication to lunch or dine with him.

A royal invitation is equivalent to a command. Trembling, the minister obeys. After coffee and cigars, the king suggests a little ride into the country. The minister has to reply that he would be only too delighted and honored.

Once the bad patch of roadbed is reached, the monarch takes the wheel himself. Driving at first slowly, he gradually steps on the gas until he is hitting the seventies.

He takes care to see the minister is in the back seat, over one wheel. He never looks back to observe the anguished ministerial features. Once the drive is concluded, he turns around blandly and says, "You see, Your Excellency, our roads are not so bad, after all!"

The next day sees a sizeable working gang mending the offending highway.

C.W.N.A. Officers

Charles Clark, Of High River, Is Elected President

Charles Clark, of High River, Alta., was chosen president of the Canadian Weekly Newspapers' Association at the concluding session of the association's convention at Vancouver. Delegates wound up their business while on a boat trip from Vancouver to Powell River, B.C., 70 miles up the coast.

Directors include: Saskatchewan, Donald Dunbar, Estevan; John Scott, Whitewood; S. J. Dornan, Alameda; Andrew King, Rouleau; Cameron McIntosh, North Battleford; Sam Wynn, Yorkton.

If sleep is conducive of beauty some people must suffer from chronic insomnia.

Problem For British Banks

No Way To Stop Deposits From U.S. Citizens

A large volume of "unwanted" United States money being deposited in banks of the United Kingdom constitutes a problem that so far has defied solution, two prominent United Kingdom delegates to the British Commonwealth Relations Conference said at Toronto.

"The bank rate in England is very low now," Viscount Cecil of Chelwood, chairman of the United Kingdom group, said in an interview, "and one of our chief problems is the flood of unwanted money that is pouring into the banks. These funds, deposited in the main by United States investors, are subject to withdrawal at 24 hours notice and are of little or no value, though it has not been discovered yet how to get rid of them. Their deposit appears to be actuated by a desire on the part of the depositors to find the safest place possible to house their assets."

Viscount Cecil was confident England was on the road to economic recovery. He said a great deal of building was going on throughout the country. Road construction was another feature of development prominent this year.

Expedition To South Pole

Rear Admiral Byrd On Quest Of New Territory For U.S.

With a crew of 70 scientists and adventurers, Rear Admiral Richard E. Byrd, is sailing on his second expedition to the Antarctic.

The aim of the exploration is twofold: To chart and claim for the United States any areas of ice recession about the South Pole, and to determine the extent of deposits of oil, coal and other natural resources.

The aviator and explorer announced his plans after arranging for the aerial details of the expedition.

"We all feel that the steady recession of ice should have left some 500,000 square miles of land about the South Pole, Byrd said—a trace of excitement in his voice as he talked of his new venture.

The bulk of this land, the explorer said, should be between the South Pole and South America—most of it adjoining Evelyn Byrd Land, named for his mother—which was claimed for the United States on his expedition of three years ago.

Power Of Hypnotism

London Doctor Can Influence One Patient Over Telephone

How he hypnotizes a patient over the telephone was told by Dr. Hildred Carlill, of London, during a lecture in Westminster Hospital. "This patient," he said, "has had to be hypotized many times. The man has become so saturated with my dominance and so easily amendable to my suggestions that there is no need for him to be in the room. If he were in Paris and I telephoned him he would do exactly as I told him. If you are wise you will not lightly allow yourself to be the subjects of hypnotism. It is not worth it. It is a terrible business. Yet in certain conditions people can be cured in a day with the judicious help of hypnotism."

New Use For Radio

Installed As Means Of Communication On Russian State Farms

State and collective farms have grown so large in the U.S.S.R. that something had to be done about communication between various sections. The Institute of Electrification of Agriculture reports that it has installed radio receivers and transmitters on the tractors of one farm near Leningrad and solved the problem. The boys and girls now plow merrily along and pass the time away chatting with one another "over a distance of many miles."

Mutual Interests

Two men were travelling on a northbound train. Presently one, hoping to break the ice, asked his fellow traveller:

"What's your line of business?"

"It may sound strange," said the other, "but I'm a pepper traveller."

The first man threw out his hand. "Shake!" he said. "I'm a salt seller."

INITIAL POOL PAYMENT 45c. IN SASKATCHEWAN

Winnipeg, Man.—Substantial increases in initial payments on pooled wheat this year were in store for farmers of western Canada today. The Saskatchewan wheat pool has announced an initial payment fo 1933-34 pooled wheat of 45 cents a bushel, basis No. 1 Northern, Fort William. This is an increase of 10 cents per bushel above the payment made last year. Alberta and Manitoba boards will meet in a few days, when a final decision respecting their initial payments will be made.

In view of the lateness of the announcement wheat growers in Saskatchewan who delivered grain to country elevators after July 15 will benefit from the increased payment. They have already received an advance of 35 cents, equivalent to last year's initial payment. Alberta and Manitoba wheat pools have been accepting this season's wheat on the basis of a 35-cent initial payment.

Saskatchewan wheat pool's init'al payment for 1933-34 pool deliveries will be 45 cents, basis No. 1 Northern, Fort William.

This represents an increase of 10 cents over the initial payment made last year.

A press statement from pool headquarters reads:

"The policy of the organization as established last year requires the grower to declare his intention of pooling at the time he delivers his first load. The same policy is in effect for the present crop year. In view of the lateness of the announcement of the initial payment, however, the growers having grain in store at country elevators which was delivered after July 15 will have the opportunity of delivering their wheat to be marketed through the 1933-34 pool, provided they do so within three days after this announcement is received at their country elevator.

"Already a substantial quantity of grain has been delivered for marketing through the pool, on which an advance of 35 cents (One Northern basis) has been made. This advance is equivalent to last year's initial payment. Adjustments in order to bring this payment up to 45 cents will be mailed immediately to pool elevator agents for distribution.

"The first five grades are deliverable to the 1933-34 pool, from One Hard to No. 4 inclusive."

Fourth Tour Of Canada

Englishman Claims To Be Champion Cyclist Of World

Calgary, Alberta.—John R. W. Crawford, policeman, soldier and sailor in his hectic career, who hails from Sunderland, England, claims to be the world's champion cyclist with 150,000 miles to his credit.

Crawford, touring on his bicycle since 1919, has visited almost all countries in the world. He is now touring Canada for the fourth time and rested here a few days before starting westward.

Ontario School Does Away With Homework

Oakville Collegiate Will Add Extra Hour To School Day

Oakville, Ont.—The virtual end of home work and detentions for high school students, with more work done in less actual studying time, will mark a new educational plan to be introduced into Oakville High School by Principal R. H. Archibald.

An hour will be added to the school day, but practically no home work will be called for from lower and middle classes, while upper school home work will be cut in half.

Elects First Woman Member

Wellington, New Zealand.—The first woman member to be returned to the New Zealand parliament was elected in Lyttleton. She is Mrs. Elizabeth R. McCombs. She succeeds to the seat made vacant by the death of her husband. Mrs. McCombs ran as a Labor candidate and received 6,080 votes. F. W. Freeman, Coalition nominee, obtained 3,480 votes, and A. Hills, Independent Labor 263.

W. N. U. 2012

Canada Has Butter Surplus

Ten Million Pounds More Than Needed For Domestic Use

Ottawa.—Canada suddenly finds itself with 10,000,000 pounds more butter than will be needed for domestic consumption this winter. W. H. Forster of Hamilton, president of the National Dairy Council, and Allan C. Fraser, manager and secretary, with other members of the council, had conferences with Hon. H. H. Stevens, Minister of Trade and Commerce, and Hon. Robert Weir, Minister of Agriculture, to see what can be done about it.

The impression seems to be that Canada made too much butter and not enough cheese. Canadian cheese commands a premium on the British market and the butter has to take a discount as compared with the New Zealand product.

Storage figures on September 11 showed 41,490,441 pounds of butter on hand whereas last year the total on the corresponding date was 30,605,169.

Western Canada holders of butter are reported to be prepared to take a loss and ship this suplus butter to the United Kingdom, rather than glut the domestic market. There is a move on foot to do the same with Ontario butter. The conversations Tuesday were to devise the best means of going about the task and no definite decision was reached.

Moved From Office

Senator Murdock No Longer Vice-President Of Railway Trainmen

Cleveland, Ohio,—Senator James Murdock was removed from the office of Canadian vice-president of the Brotherhood of Railway Trainmen by the executive board of the organization.

The removal, to take effect Sept. 15, came after President A. F. Whitney, of the brotherhood, had made nine charges against Murdock for failure to perform his duties properly. Six of these charges were sustained by the executive board, among them the allegation that Senator Murdock "failed in his duties as an officer" in handling the now pending wage dispute in the Dominion.

Whitney in a statement said:

"Murdock's whole attitude in the wage situation in Canada was found by the board to be lukewarm. The wages there now are 17½ per cent. lower than they are in the United States."

Government To Contribute

Pay 75 Per Cent. Of Freight Charges On Exhibits To Winter Fair

Ottawa, Ont.—The Dominion policy of paying 75 per cent. of the freight charges on carloads of livestock from all provinces, with the exception of Ontario, to the Royal Winter Fair opening in Toronto on November 22, is being continued for this year. Announcement to this effect was made by the Department of Agriculture.

The policy is applicable only in connection with transportation from assembling points to Toronto and also to assembling points on the return journey. Any charges incurred before the carloads are assembled, and after they each the assembling points on the return journey, will not be considered as a charge against the Dominion government.

The 75 per cent. contribution by the Dominion is to be paid on condition that the province, in each case, pays the remaining 25 per cent.

British Naval Officers Make Hazardous Voyage

Sailed Across Pacific In Fifty-Four-Foot Ketch

Victoria, B.C.—An adventurous 6,000-mile sailing voyage from Hong Kong ended Sept 12, when the 54-foot ketch "Tai-Mo-Shan" dropped anchor in Victoria Harbor. Five British naval officers, en route to England, were aboard.

The craft, which has no auxiliary power, sailed all the way across the Pacific. The trip was made via Yokohama, Attu, in the Aleutian Islands, and Dutch Harbor, Alaska. The party is sailing to the United Kingdom for the adventure.

The ship was hove-to for 20 hours when a typhoon passed nearby in eastern waters. But no damage was suffered

COL. R. S. McLAUGHLIN

Prominent Canadian automobile industry leader who, in a recent speech warned the government of the peril in over-taxing automobiles. Col. McLaughlin stated there was "danger of killing the goose that lays the golden eggs."

Favor Rejection Of Cut

Great Number Of Railwaymen Vote Against Pay Reduction

Montreal, Que.—"Trainmen, conductors, telegraphers, engineers and firemen in Montreal and vicinity now voting on the general strike referendum being conducted by the railroad running trades, have filed an overwhelming number of ballots in favor of a strike as an alternative to taking another pay cut," The Montreal Star says.

"It was discovered that with the exception of the telegraphers the brotherhoods were casting their votes almost unanimously in favor of rejecting the cut. The telegraphers, it was found, are voting in the proportion of 65-35 for a strike, if negotiations with the companies cannot be successfully completed," the paper continues.

Plight Of The Farmer

Has Borne The Brunt Of Hard Times On The Prairies

Calgary, Alberta.—"Unless more consideration is given the farm population of the prairie provinces by the national economic policy a situation may arise which will have exceedingly serious consequences," according to L. D. Nesbitt, publicity director of Alberta Wheat Pool, in an address here.

"No nation," he added, "has been more seriously injured by declining prices of agricultural products than has Canada and the prairie provinces have borne the brunt of it." He denied the trouble was due to lack of efficiency or skill on the part of the farmers.

Wins Fortune

Montreal Man Wins Large Sum In Sweepstake Ticket

Montreal, Que.—Adrien Vanier, 59-year-old shoe store manager reported to have won $54,000 on a sweepstake ticket in the St. Leger classic, stepped into court and drew out a summons against his wife on a charge of participating in a lottery. Mrs. Vanier is scheduled to appear in court this week.

Vanier took action against his wife under section 236 of the criminal code, which provides that money obtained through illegal sweepstakes "is liable to be forfeited to any person who sues for the same by action or information in any court of competent jurisdiction."

The winning ticket was held in Vanier's name but, it is presumed, on the basis of his action, that it has been transferred to his wife. As informant he will be entitled to retain earnings of the ticket.

Two Canadians and one American reaped small fortunes as a result of the running of the St. Leger stakes at Doncaster, England.

Besides Adrien Vanier, 54, of Montreal, a ticket on Felicitation, the second horse, is held by A. Labelle, of Quebec City, who receives $36,000.

William A. Hasse, Calumet City, Ill., held a ticket on Scarlet Tiger, in third position. Hasse wins $18,000.

Choice Cattle For Churchill Shipment

Twenty Carloads To Go From Saskatchewan And Alberta

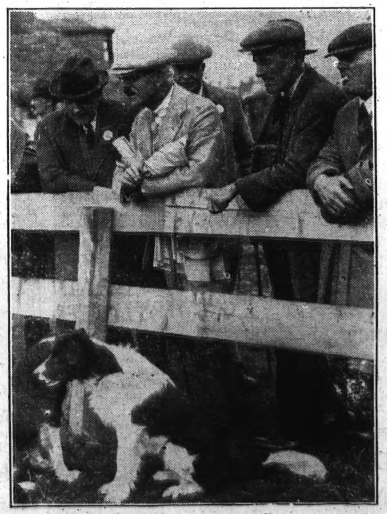
Calgary, Alberta.—Several carloads of cattle from Calgary and other Alberta districts, will be included in the shipment to leave Churchill, Manitoba's northern seaport, for the United Kingdom, September 27, aboard S.S. Brandon.

Jack Byers, manager of the Western Stock Growers' Association, is handling the shipment of 200 head of prairie cattle and plans collecting a number from this area.

It was pointed out by Alberta cattlemen they had urged a trial shipment of beef cattle be sent through Churchill earlier in the season, the proposal sponsored by various organizations, but difficulties were met. Close co-operation, however, between provincial and Dominion ministers removed the obstacles, making the September 27 shipment possible.

Costs of shipping via Churchill will be comparable with those of the Montreal route, it was added. Twenty carloads are expected to be taken from Saskatchewan and Alberta with choice steers, weighing 1,100 to 1,200 pounds receiving preference so the consignment will be well received in the Old Country.

RAMSAY MACDONALD ENJOYS LEISURE



After the strenuous Economic Conference sessions in London, Ramsay MacDonald went North to his native heath to enjoy a well earned rest. Here we see him (centre) at the Scottish dog trials held at Keith, Banffshire. He is watching one of the competitors in action penning sheep while other rivals crouch at the British Premier's feet waiting their turn to perform.

MOTOR OWNERS PAY HUGE TAX TO OPERATE CARS

Ottawa, Ont.—Motor vehicles operated in Canada ran their owners into a tax bill of $56,700,000 last year, according to an estimate released by the Dominion Bureau of Statistics. That meant over $50 for every registered motor vehicle—to say nothing of the fines.

The provinces collected $21,126,271 for registration fees on vehicles and operators, and another $27,083,316 in gasoline taxes. The Dominion took in $4,508,471 on import duties and excise taxes. In addition there was the sales tax on cars sold, estimated at $2,500,000, and the import duty on gasoline, estimated at $1,500,000.

Motor vehicle registrations in Canada for 1932 amounted to 1,114,503, including 945,564 passenger automobiles, 1,530 motor buses, 157,990 trucks and other commercial vehicles and 9,419 motorcycles.

This was a decrease from the 1931 registrations of 86,404 motor vehicles, or 7.2 per cent. The greatest decrease was in New Brunswick, where total registrations decreased by 16.6 per cent. and passenger cars by 17.8 per cent., and Saskatchewan followed with a decrease of 15.5 per cent. in total registrations.

Canada, with one motor vehicle to every 9.4 persons, ranked fourth in density, the United States leading with a density of one motor vehicle to every 5.1 persons and Hawaii and New Zealand ranking second and third. Ontario, with 6.5 persons per motor vehicle, had the greatest density in Canada, British Columbia was second with 7.7 persons per motor vehicle.

Caring For Livestock

Alberta Announces Policy For Dried Out Areas In Province

Edmonton, Alta. — Announcement of the policy under which the feed shortage situation in the dried-out areas of the province will be cared for was made by Hon. George Hoadley, arrangements having just been completed with the federal government and the railways in the matter.

The policy covers not only the shipment of feed for necessary farm livestock into the areas concerned, but also the shipment of commercial cattle and sheep, and of farm work horses out of the areas to winter feeding quarters. Shipment of commercial cattle and sheep to winter feeding quarters will be undertaken on application from bona fide owners of such livestock, who shall certify that the stock are for winter feeding and that the ownership will be retained until such time as permission for sale is granted by the Department of Agriculture.

There will be no cost to the shipper for freight, the railways having granted 50 per cent. of the cost and the federal and provincial governments bearing equally between them the other 50 per cent.

Expect Large Wheat Yield

District In Southeastern Alberta Places Figure At 2,525,000 Bushels

Calgary, Alberta.—In the district between Stirling and Manyberries, in southeastern Alberta, farmers expect a larger yield of wheat than last year, placing the figures at 2,525,000 bushels. This area is the bright spot of drouth-stricken southern Alberta.

With prices about 50 per cent. above last year, the farmers of the Stirling and Manyberries district expect to emerge to some extent from debts which submerged them during lean years. They are in a better position than farmers in districts which usually produce good crops.

The average yield is expected to be 18 bushels per acre, with Etzikom district reporting a 50-bushel yield on one farm.

Canadian Poultry Free

Ottawa, Ont.—The tariff which the United Kingdom imposed on dead fowl, ducks and geese from foreign countries after September 15 will be three pence a pound instead of 10 per cent. ad valorem. The Canadian product will continue to go into U.K. markets free.

Here It Is Again!

The "Mummy wheat" racket still continues. A recent issue of The Times of London, England, contains an article on the discovery of wheat several thousand years old as the result of excavations at Mohenjo Daro in Sind, India. It was stated in this article that an ear of wheat was unearthed from a tomb at these excavations, which was apparently from three thousand years to four thousand years old, and that this wheat had been reproduced. The article further stated that seed from this ancient wheat can now be obtained at one shilling an ounce (about $3.84 in Canadian money) from an enterprising young lady in West London.

It is rather humorous that the "Thunderer" should fall for this new revision of the old "mummy wheat" yarn. It is almost as ancient as the Spanish prisoner letter game. From the description given of the wheat it is obvious that it is an inferior variety of Durum, much the same as that distributed on previous occasions under the false impression that it was reproduction of wheat obtained from one of the Pyramids of Egypt.

Wheat loses its germinative powers within a comparatively short time; in fact it is exceedingly dountful if wheat twenty years old will grow. It is ridiculous to suppose that wheat buried for several thousand years could reproduce itself.

Where The High Country Calls

Adventure has found a splendid and thrilling outlet in the new order of the outdoors, the Sky Line Hikers of the Canadian Rockies. Organized at Banff and Lake Louise this season, the new order provided such happy, healthful opportunities for hiking over the high passes, Alpine Meadows, and mountain trails of the National Parks of Canada, that devotees of the outdoors throughout Canada and the United States are now singing its praises. The inaugural hike this year took a large party of enthusiasts, under the expert direction of Swiss Guides Ernest Fues and Rudolf Aemmer, through Paradise Valley, over the high trail past Lake Annette, and over Sentinel Pass to Moraine Lake. The second day's journey took the hikers across the magnificent Wenkchemna Glacier, and through the flower-decked Wenkchemna Meadows, and finally over the snow-bound pass of that name to Eagle's Eyrie on Tokum Creek. The third day saw the conquest of Opabin Pass, some tricky work on the glaciers and finally the Lake O'Hara Bungalow Camp. Hikes in the O'Hara country and the Pow Wow occupied the fourth day, and the eight-mile hike to Wapta ended this truly historic expedition. Norman B. Sanson of Banff, is the President of the new order, which is now in full swing with steadily increasing membership. A four-day hike in the Yoho Valley will be one of the major activities next summer.

The picture lay-out well illustrates the happy moments on the trail. Carl Rungius, internationally famous artist, is seen extolling the virtues of the Alpenstock to Miss Georgia Engelhard, celebrated mountain climber and New York socialite. A group of the hikers triumphant on Sentinel Pass enjoying the splendid view down in the mountain valleys below. The first annual Pow-Wow and the Sun-dance Lodge.

EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On their first date Peter spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the financial pace. A chance meeting, however, paves the way for another date. This time they walk in the park. Camilla tells Peter that she is not rich; or, at least, will not inherit the Hoyt fortune. Peter in turn confesses he is practically penniless. They fall into each other's arms. Together, in the park, Peter and Camilla try to arrive at some plan for the future.

(Now Go On With The Story).

CHAPTER IX.

Camilla lived in a new world, thereafter. Her face glowed with happiness and she walked buoyantly, as if the strength of Peter's arms had entered her body. The austere grandeur of the house that was still her home seemed to her more friendly and intimate, as it had been in the days before she learned that it was not her home and would refuse soon to shelter her.

Seated alone on one side of the long table in the dining room, with Mrs. Hoyt, portly and jeweled and unequivocal at one end, and Mr. Hoyt, grim and silent and critically aloof at the other, Camilla managed a new cheerfulness that surprised her benefactors. Her joy was so abundant that it bubbled over and affected the lives of everyone around her.

She was even more gracious in her social obligations. She discovered new things to like about people whom she had grown almost to detest, and her world reflected her happiness as the evening sky reflects the roseate colors of the setting sun.

Mrs. Hoyt asked no questions, but she was confident that very soon Camilla would disclose her secret. She believed that she knew how to manage girls, having devoted much time to the psychology of adolescence, the reactions of youth to life and analytical character study. She believed that she had prepared herself adequately to handle any emergency in her duties toward Camilla. Beside, she had mothered Camilla for seventeen years.

As a matter of fact, she knew as little about Camilla as the daughter she never had borne. Her knowledge of children always had remained in the abstract, in spite of her experiences with this child. From the beginning, Camilla had managed her foster mother as successfully as Mrs. Hoyt had believed she had managed her foster daughter. With the intuitive shrewdness of the diplomat, Camilla had learned to submit apparently to her autocratic rule, to confide naively all that was least important to her, and to live within herself with a secret exultation.

Camilla had been right when she told Peter hers was a dual personality. She had been divided against herself from the day she went to live in the Hoyt mansion. That part of her which was vivacious and rebellious had smouldered and ached, while she obeyed her mother's constant admonitions to speak softly, walk sedately and submit docilely. Fortunately, that barbaric element in her nature had not been smothered. Its chastened, cultivated verve, now awakened by the primitive urge of love, manifested itself in spontaneous laughter, generous impulsiveness and an eager impatience to fulfill her destiny.

Mrs. Hoyt immediately suspected a romance. She watched her with her friends, trying to discover which man had aroused her interest, the girl's attitude betrayed nothing. Her new graciousness was impartial. She arranged special occasions to talk with Camilla alone, making subtle hints that would lead to reluctant confidence. It was not her policy that anything should transpire under her roof in the lives and minds of the people there, of which she did not know every detail.

But even as Camilla deceived her righteously, she had suspected long ago that Alexander Hoyt employed the same defense against his indomitable wife. His thin, straight lips never smiled with pleasure, but Camilla often detected the reflection of an inward twinkle in his keen, dark eyes. It even seemed to her that he derived amusement from the very thought that Amelia Hoyt was not getting away with as much as she believed she was. But whatever she believed did not trouble him. His capacity for authority was exhausted in his business and he was well content to give his wife the reins at home.

When Camilla had first lived with the Hoyts, everyone had been amazed that she did not fear his austerity, for he appeared to treat her no differently than anyone else, and everyone held him in awe. But the two martyrs of Amelia Hoyt's tyranny apparently had discovered a sympathetic bond that is common to all martyrs of the same cause, and without putting it into words or actions had lived by its sustaining power.

The nearest gesture toward paternal affection that Alexander Hoyt ever had displayed for Camilla was when he rarely took her awkwardly upon his knee, as a child, and permitted her to examine his watch; or when he shyly smuggled a gift for her under the Christmas tree. He never had praised or humored her, but as she grew older, Camilla was sure that she sometimes detected a flicker of withheld approbation in his eyes.

At other times, when she was reprimanded or commanded by Mrs. Hoyt, she suspected that he was laughing with her at her quiescent submission. Did he, too, only appear to submit to Amelia to save argument and energy, because opposing her was as useless as hurling one-self against a stone wall?

Years later, he had been the kinder of the two when they had explained to her their plans for her as their temporary ward. Almost, her resentment had caused her to commit some rash act when the woman whom she had accepted as her mother had turned the world upside down for her. Amelia had approached her, oh, so tactfully and warily, admitting the fact that it was a delicate situation which she was handling wisely with gloves. Which attitude was exactly what Camilla had resented most about the whole affair. Her cold practicality had congealed Camilla so that there was no emotion left in her numbed consciousness; but when Alexander talked with her about the situation, his curt sympathy melted her so that she found herself feeling a kind of pity for him rather than for herself. She even could make some sense of the whole strange affair. It had been Mrs. Hoyt who had started it, impulsively, but it was this silent, unemotional man who reconciled the bewildered girl to the facts.

"You understand, Camilla, that this was not my idea in the beginning, but I want to share the responsibility," he told her quietly. "I should have preferred that you had grown up knowing the truth, but—" he just looked at her, as much as to say that she would understand why his idea had not prevailed. "If we have done you a very great injustice, I'd like to try to make it right, somehow. You have three years in which to adjust yourself before you need to change your position here as our daughter. Will you let me know how I can help you, at any time?"

Camilla had promised that she would and, later, when she had proposed to enter National, at the evidence of Mrs. Hoyt's consternation, she had glimpsed one of his silent messages of approval, she was almost sure. He seldom displayed any interest in her work and so far as she knew, did not take her ambition seriously. But he never opposed her.

The situation between her own parents was quite the opposite, she learned when she began to visit in their home. During the fourteen years while she had lost her identity with the Lorenz family, she had gone there occasionally with Mrs. Hoyt, and very rarely her own mother had visited her at the Hoyt's.

But she had known them only as a family in which Mrs. Hoyt was curiously interested. She had played with Rose and Frank and Anna and the others at various times, and liked them well enough, unaware that they were brothers and sisters.

Her own father—bossed and bullied at the foundry by foremen and subforemen, became the autocrat at home the moment he entered the door. His wife meekly accepted his rule to the letter, impressed the children with his authority and commanded their obedience with the dire threat of, "You'll see what happens when I tell your Pa on you, tonight!" It was usually effective.

Camilla could remember as a child how she had feared to visit at the Lorenz home when he was there. Several times, he had taken her on his knee and chucked her under the chin and laughed raucously at her frightened expression. At first, she had been kept away from them long enough for her to forget her family elation, but vague memories had stirred in her childish mind and troubled her, every time she saw any of them through the years.

After the revelation of the whole situation, she had gradually fitted together that series of memories and incidents, like a difficult picture puzzle. She loved her own mother with a mingled pity and resentment, but she never was able to think of "Pa" Lorenz as her father. From her modern and sophisticated background of culture, she studied and analyzed him, recognizing an occasional characteristic of her own; but hers had been so refined and cultivated that little resemblance was left.

Henry Lorenz was the kind of naturalized American citizen who liked to call attention to a yard of parked automobiles at the factory and boast with a slight accent, "See them cars—hundreds of 'em? Who owns 'em? We all do. Yes, sir! Even laborers in this country ride to work in their own automobiles. You don't see nothin' like that in the old country. Why, a man does well to have black bread and sour milk over there. We have the best of everything here: food and clothes and homes, and our own automobiles—everything. Yes, sir!"

His boast was not so much a testimony of patriotism as it was an indirect praise of his own wisdom in adopting this new country for his own. Camilla had reconstructed that ambition in her imagination.

(To Be Continued.)

"The prettiest rag rugs I ever saw"

"I feel I should share with you a wonderful compliment I had on my new rag rugs," writes an appreciative Three Rivers woman. "A wealthy lady from the City of Quebec was visiting here and saw the rag rugs I had just finished. She was so enthusiastic—said she had never seen such artistic ones, with such rich, lovely colors. She asked me if I bought new materials to get such beautiful color effects. When I told her I had dyed my old scraps with Diamond Dyes, she simply couldn't believe it. Of course I'm very proud of my rugs. Besides being beautiful colors, they are fast and washable." In the popular new art of rug making women are finding again the real value of Diamond Dyes for permanent dark colors by boiling. No other dyes make old materials look so new and rich in color, because no other dyes contain so much of the finest aniline colors. For light dainty shades without boiling for lingerie, summer blouses and dresses, use the wonderful new Diamond Tints. All drug stores have both Diamond Dyes and Diamond Tints.

Little Helps For This Week

"O fear the Lord ye His Saints; for there is no want to those who fear Him."—Psalm 34:9.

"Thou openest Thine hand and satisfiest the desire of every living thing."—Psalm 145:16.

What Thou shalt today provide,
Let me as a child receive;
What tomorrow may betide,
Calmly to Thy wisdom leave.
'Tis enough that Thou wilt care;
Why should I the burden bear?
—J. Newton.

Have we found that anxiety about possible consequences increased the clearness of our judgment, made us wiser and braver in meeting the present, and arming ourselves for the future? If we had prayed for this day's bread and left the next to itself, if we had not huddled our days together, not alloting to each its own task but ever deferring that to the future, and drawing on the future for its own troubles which must be met when they come whether we have anticipated them or not, we should have found a simplicity and honesty in our lives, a capacity for work, an enjoyment in it, to which we are now for the most part strangers.—F. D. Maurice.

An Extraordinary Tunnel

Built In England To Test Air Currents For 'Planes

At the Royal Aircraft establishment at Farnborough, an extraordinary tunnel is nearing completion. It is 24 feet in diameter and it is so arranged that currents of air at speeds up to 200 miles an hour can be blown through it. Its purpose is to enable experiments to be made on aeroplanes. The tunnel is nearly 500 feet in length, but it is made on a curve and housed in a building 230 feet long, 140 feet wide, and 90 feet in height. The wind is produced by fans driven by motors of 2,000 horse-power. In designing aeroplanes it is of the utmost importance to know the air resistance of a particular shape of wings, or body or engine cowling. Hitherto experiments have been made either in actual flight or with miniature wind tunnels. To make them in flight was a risky business, and all dangers will be eliminatel by the tunnel. The speed of an aeroplane can be enormously reduced by parts whose shapes are not exactly correct. It has been found that a round strut has an air resistance a hundred times as great as one of a streamline shape.

Must Own Gas Masks

Disturbed at the political situat'on in western Europe, the Turkish Government has decreed that all Turks must provide themselves with gas masks at their own expense and that in every village gas and bombproof shelters must be built. The government, it was added, would build factories to make gas masks.

HELP FOR TIRED WIVES
Take Lydia E. Pinkham's Vegetable Compound

Wives get tired during these hard times. They are the ones who must bear the burdens of the family. When the husband comes home with less money in his pay envelope . . . it is the wife who must struggle along and make the best of things.

If you are tired . . . worn out . . . nervous, try Lydia E. Pinkham's Vegetable Compound. What you need is a tonic that will give you the strength to carry on.

98 out of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your druggist today . . . and watch the results.

Madame Lacroix's delicious CHOCOLATE LAYER CAKE

½ cup butter
1 cup sugar
2 eggs
1 teaspoon vanilla extract
1 cup milk
2½ cups pastry flour (or 2 cups and 3 tablespoons of bread flour)
3 teaspoons Magic Baking Powder
¼ teaspoon salt

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and flavoring; add flour, sifted with salt and baking powder, alternately with milk. Fold in stiffly beaten egg whites. Bake in 3 greased layer cake pans in moderate oven at 375° F. about 20 minutes. Recipe for Chocolate Icing and Filling is in the Magic Cook Book.

Why Magic Baking Powder is used exclusively at this

Montreal School of Domestic Science

"We teach our students only the *surest* methods," says Madame R. Lacroix, Assistant Director of the Provincial School of Domestic Science, Montreal. "That's why I always use and recommend Magic Baking Powder. Its high leavening quality is always uniform. You get the same satisfactory results every time you use it."

And Magic Baking Powder is the unquestioned choice in the majority of cooking schools throughout the Dominion. Cookery teachers—and housewives, too—prefer Magic because of its consistently better results.

Free Cook Book—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ontario.

Tested and Approved by Chemical Laboratories Chatelaine Institute Philadelphia Augusta

"CONTAINS NO ALUM." This statement on every tin is our guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

Made in Canada

An electrically-driven miniature motor car intended for children's use in gardens and private grounds is being marketed in England. The pseudo-auto has all the fittings—gears, self-starter, horn, lamps, accelerator, etc.—of a real auto.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS
Wake up your Liver Bile
—No Calomel needed

When you feel blue, depressed, sour on the world, that's your liver which isn't pouring its daily two pounds of liquid bile into your bowels.

Digestion and elimination are being slowed up, food is accumulating and decaying inside you and making you feel wretched.

More bowel-movers like salts, oil, mineral water, laxative candy or chewing gum, or roughage, don't go far enough.

You need a liver stimulant. Carter's Little Liver Pills is the best one. Safe. Purely vegetable. Sure. Ask for them by name. Refuse substitutes. 25c. at all druggists. 42

HAMILTON, ONTARIO

For the Needy Families.

Co-operative arrangements have been completed between the Provincial Gov't, railways and municipalities for supplying vegetables during the coming winter to families in the drought stricken areas Under the scheme, potatoes are being obtained by the department in Edmonton. The railways are transportation these free of freight costs to required points in the dry areas; from there the supplies will be distributed thru M D. Secretaries to families who apply, the price to them to be that at which they were obtained by the department in Edmonton. The arrangement is entirely co-operative and made possible thru the goodwill and generosity of railways and other agencies working with the department. Farmers in the district who have a surplus of vegetables on hand who wish to dispose of these at a reasonable rate, the Dept. of Agriculture would be willing to consider any offers.

"After the Clouds Roll By."

The bright sunshine Tuesday morning sure came as a welcome sign to those engaged in harvesting operations. The sheaves had become pretty well drenched by Sunday's rain storm. Some farmers are finishiug up their grain cutting, but threshing will probably not be resumed till Monday.

United Service at Bright Bank next Sunday at 3 p.m.

United Church service every Sunday Evg. at 7.30.

On the Side.

Possibly they're a little more progressive in the older Provinces; at least they're inclined to cater more to the younger set; as the story comes to hand that the head boss of the Oakville (Ontario) High School has delighted the pupils by eliminating home work from the lower and middle classes, and has cut the home work of the upper classes in half.

....

¶ Mr Henry Ford seems to be getting a lot of publicity these days, along the personal line. From the stories which get this far North, Henry's offence appears to be that he's been paying higher wages than the new NIRA code calls for.

....

¶ In a certain Inspectorate, the supervisor gave a teacher some advice about associasing historical events with admonition: for example, "Don't Smoke—Remember the Chicago Fire!" So the teacher later asked the class to suggest something appropriate for "Don't spit," and an urchin responded with "Don't Spit—Remember the Flood!"

....

¶ Weather predicters over the province have been hard at work the past few weeks, the majority arriving at the conclusion we're in for a long, hard winter. The sight on Sunday evening of two flocks of geese flying high over Stony heading for Golden Spike and points south, seems to verify their conclusions.

....

¶ The Printer's D. says: "Don't Use Big Words!" and continues: In promulgating your esoteric cogitations or articulating your superficial sentimentalities and amicable philosophical or psychological observations beware of platitudinous ponderosity. Let your conversational communications possess a clarified conciseness, a compact comprehensibleness, coalescent consistency and a concatenated cogency. Eschew all conglomerated or flatulent garrulity, jejune bablement and asinine affectations. Let your extemporaneous descantings and unpremeditated expatiations have intelligibility and voracious vivacity without rhodomontade or praisical bombast. Sedulously avoid all polysyllabic profundity, pompous, ventriloquent validity. Shun double entendres, prurient jocosity, and pestiferous profanity, observant or otherwise. In other words, talk plainly, briefly, naturally, sensibly. Say what you mean; mean what you say; and Don't use big words.
